

Bogdan Carcadea

Senior QA Engineer | AI-Assisted Testing

bogdan.carcadea@gmail.com · 0766600410 · Bucharest, Romania, RO · [linkedin.com/in/bogdan-carcadea](https://www.linkedin.com/in/bogdan-carcadea)

SUMMARY

Senior QA Engineer with over 5 years of experience in software quality assurance, with an emphasis in gaming, specializing in end-to-end test strategy, cross-functional alignment, and QA pipeline optimization. Operating with a high degree of autonomy and project ownership, acted as the primary quality gateway from initial planning/roadmap to final multi-platform release. In addition, integrating AI-assisted development tools (Claude, Gemini) and foundational automation (C#, Python, Unity Test Framework) to scale testing efforts, eliminate bottlenecks, and drive studio-wide workflow standardization. Beyond technical execution, currently assigned to recruitment and mentoring, shaping the QA department's talent pipeline.

EXPERIENCE

Avantaj Play

QA Engineer | September 2025 – Present

- Orchestrating end-to-end QA strategy for a multi-platform project as sole QA owner, from planning through release validation.
- Introducing automated testing (C#, Unity Test Framework, AltTester, Python) across core application flows, cutting manual effort in smoke and regression cycles.
- Redesigning Jira workflows and tracking boards, establishing standardized reporting adopted daily across cross-functional teams.
- Holding core technical accountability for the QA department, driving recruitment, technical assessments, and mentoring of new hires.
- Producing end-of-sprint summaries covering completed and in-progress work alongside critical milestones, for cross-functional stakeholders.
- Managing the defect lifecycle end-to-end, from test case design to validated fixes, in close collaboration with design and development.

Ubisoft

Quality Analyst Technician | June 2024 – August 2025

- Serving as technical lead on select projects across dedicated sprint rotations, coordinating tester allocation, tracking KPIs, and reporting to QC leadership.
- Identifying, analyzing, and validating critical issues to secure stability and release readiness across multiple platforms.
- Collaborating with development and QC teams to reproduce, debug, and escalate high-priority defects.
- Applying functional, non-functional, and risk-based testing to maintain coverage and consistency across builds.
- Supporting milestone delivery, compliance, and certification requirements for the QC department.
- Improving end-user experience through defect reporting and fix verification via regression and validation testing.

QC Tester | March 2021 – May 2024

- Identifying and reporting defects in close collaboration with development and design teams.
- Writing, updating, and executing test cases against process requirements.
- Escalating bugs to development teams and documenting them in issue tracking systems.

Electronic Arts (EA)

Quality Controller | July 2019 – October 2019

- Identifying, analyzing, and reporting defects prior to releasing, in partnership with design and development.
- Logging bug reports in tracking databases, ensuring seamless escalation to development teams.

PERSONAL PROJECTS

QA Automation Portfolio

Personal Playwright + TypeScript framework exploring scalable automation patterns: Page Object Model, fixtures, data-driven testing, network interception, and GitHub Actions CI pipeline.

- Covering UI end-to-end test suites against a live demo app and API test suites against a public REST API.
- Implementing Page Object Model, custom fixtures, and data-driven tests, applying maintainable, scalable automation patterns.

Match-3 Automated QA Framework

Automated QA assistant framework developed for a mobile Match-3 title, built solo with AI-assisted tooling (Claude Code) to scale testing coverage beyond what a single tester could manually sustain.

- Simulating multiple player personas through configurable alter-ego profiles (distinct playstyle presets) across parallel multi-device sessions, validating personality-driven mechanics and progression loops.
- Hunting and reporting defects autonomously, extracting device logs, capturing screenshots and video evidence, and generating structured bug reports with full reproduction context.
- Covering regression and smoke test cycles across builds, with reusable test suites spanning level validation, core gameplay systems, performance, audio, events, notifications, and monetization.

Fitness AI

Solo-built progressive web app deployed on Cloudflare Workers with a live Firebase backend, built end-to-end using AI-assisted tooling within a structured Git/PR-based workflow mirroring professional release practices. live, end-to-end single-codebase production deployment.

- Building a predictive analytics engine with regression-based progress forecasting, adaptive confidence scoring, and self-correcting calorie targets that improve as more user data accumulates.
- Powering an AI conversational coach (Claude/Gemini/Groq) with persistent long-term memory and proactive daily briefings, maintaining continuity across sessions.
- Implementing a gamification engine covering XP progression, reward shop, wager challenges, power-ups, and clan boosts to drive sustained long-term engagement.

Stack: JavaScript, Firebase, Cloudflare Workers, LLM API integration, algorithm design, UX/UI design, Git/PR workflow.

SKILLS

★ Test Automation & QA

API Testing, Test Automation, QA Automation, Manual Testing, Smoke Testing, Regression Testing, Performance Testing, Mobile Testing, User Acceptance Testing, Software Testing Life Cycle (STLC), Test Planning, Test Cases, Defect Lifecycle Management, Defect Tracking, Bug Tracking, Debugging, Quality Assurance

★ Tools & Frameworks

Playwright, TypeScript, Postman, GitHub Actions, Jira, Confluence, TestRail, GitHub, Git, Jenkins, DevTrack, AltTester, Unity Test Framework

★ Programming

C#, Python, JavaScript, HTML5, CSS, MySQL

★ Methodologies

CI/CD, Software Development Life Cycle (SDLC), Agile Methodologies

★ AI & Emerging Tools

AI-Assisted Development, Claude (Anthropic), Gemini, RoVo AI (Atlassian), GitHub Copilot, ChatGPT, Cursor

★ Soft Skills

Technical Recruitment, Mentoring, Cross-functional Collaboration, Project Ownership, Attention to Detail, Analytical Skills, Problem Solving

EDUCATION

University of Bucharest

Master's degree in Multimedia and Audio-Video Production | 2025 – 2027

University of Bucharest

Bachelor's degree in Communication and Public Relations | 2022 – 2025

Polytechnic University of Bucharest

Bachelor's degree, Faculty of Energy Engineering | 2018 – 2022
